Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners:

On behalf of the Kansas Council on Economic Education (KCEE), I write to ask you to approve AT&T's proposed acquisition of T-Mobile. At the KCEE, we train teachers to teach economics and personal finance based on the belief that economics and personal finance educational opportunities are beneficial for our entire state – creating a generation of more knowledgeable consumers, wiser savers and investors, more responsible citizens, and better employees.

I want to express strong support for the proposed merger because, in short, it will mean enhanced online and mobile communications – communications that will provide more and faster access to more Kansans who need it.

Each year the KCEE's programs reach more than 625 Kansas schools, more than 15,000 Kansas students, and approximately 1000 Kansas teachers. The programs help students and teachers and wouldn't be successful were it not for access to the technology that allows Kansans to participate in them. With this merger, Kansas will see increased access to wireless broadband service, service which will be faster and higher quality. It will allow the KCEE to reach more students and more teachers and that's what we are all about.

Sincerely,  
Kansas Council on Economic Education

  
James J. Graham  
President and CEO
